

Week 5

Summary: During week 5, we finalized our PPT based on the feedback from the course instructor and cleaned the datasets to ensure they fulfilled the project's requirements.

References: Kaggle.com, huggingface.co

Challenges: We must decide what features in the dataset to omit based on our topic and the long-term goal of our task and resize images to train the model more effectively.

Next Steps: Finalize models, Divide datasets in train test and validation sets, and work on R3-R5.
