

Week 2

Summary: In week 2 we read the coursework specification and everyone in the group started searching for image and tabular datasets.

References: [Kaggle.com](https://www.kaggle.com), huggingface.co.

Challenges: Understanding what types of datasets to find and how to find them. But we discussed together and found out what kind of dataset we need and find datasets in websites like [kaggle](https://www.kaggle.com), [huggingface](https://huggingface.co).

Next steps: We pool all our ideas together and confirm one image dataset and tabular dataset each.
